

Lena Badhia

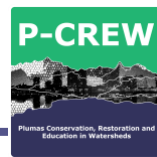

Lena, 18 years old, is from the East Bay where she was born and raised. She enjoys roaming around the area, whether it be hanging out in the city, hiking in the redwoods, or going to the beach. The outdoors for Lena is a beautiful and respected playground of fun, exploration, and knowledge. Engaged in a world of art, Lena also enjoys museums, music, ceramics, and many

crafts. She jams sometimes with friends but also enjoys solo guitar time by the marina. After graduating Berkeley High, she worked at a largescale Ceramics studio, which she found herself using many developed skills from PCREW! So now she looks forward sharing and furthering these skills with others. PCREW was an amazing experience that she is excited to be a part of again.

Kylie Kersh

Kylie was raised in Northern California in a small community near Lassen National Park. Growing up, winters mainly consisted of skiing at Lake Tahoe on the weekends. Summers were spent adventuring outdoors, camping, hiking and swimming in beautiful, clear lakes. Traveling and admiring how beautiful nature is led to a passion for conservation. She is graduating from Lassen High School and will be attending college in the Fall. After her learning experience at P-CREW session two of 2018, she is happy to announce she will be returning for session one of 2019! Kylie can't wait to expand her knowledge of the environment and gain more

leadership experience. She is excited to meet and make connections this summer with her new crew!
